PROFESSIONAL SUMMARY

Results-driven Data Analyst and Web Developer with hands-on experience building data infrastructure, automating workflows, and developing web systems. Proven ability to drive operational efficiency through RPA, ETL pipelines, and AI integrations. Skilled in managing data across multi-branch environments and delivering actionable insights through dashboards and analytics.

WORK EXPERIENCE

Data Analyst | Ubest Development Inc.

October 2025 – May 2026

- Built a centralized Data Department System, establishing a core infrastructure for all data operations across 64 store branches in Cebu, Negros, Leyte, Bohol, and Ilo-ilo.
- Improved SKU sales accuracy to 80% through fully automated calculations, eliminating manual data entry.
- Applied ABC and XYZ analysis to classify slow-moving and fast-moving SKUs, enabling smarter inventory decisions.
- Implemented Robotic Process Automation (RPA) for repetitive tasks including web scraping and Windows software interaction, achieving 90% faster task completion.
- Developed an AI assistant within Lark Base for automated data organization, cleaning, and dynamic table creation.
- Built an end-to-end ETL pipeline: extracted data from CRM server, transformed it into structured format, and visualized transaction details and daily sales in a centralized dashboard.

Frontend Developer (Intern) | Logicbase Interactive

January 2025 – May 2025

- Developed Moneycache, a Point-of-Sale (POS) web application, serving as the primary frontend developer using Next.js and React.
- Built business logic on the backend using Laravel following the MVC (Model-View-Controller) architectural pattern, ensuring clean separation of concerns and maintainable code structure.
- Designed and implemented a MySQL database schema for storing transaction records, product data, and user information.
- Implemented secure user authentication using Laravel Passport, enabling token-based API authorization across the application.
- Designed responsive UI components and integrated RESTful APIs from the Laravel backend to communicate seamlessly with the React/Next.js frontend.

PROJECTS

BuksU LabSecure System |

August 2023 – March 2024

Role: Backend Developer | Bukidnon State University

- Developed a laboratory access management system using Laravel as a full-stack framework.
- Integrated an embedded RFID system for smart lab access control, unauthorized entry monitoring, attendance tracking, and scheduling for students and faculty.

MCity Veterinary |

August 2023 – December 2023

Role: Backend Developer | Malaybalay City Veterinary Office

- Built a veterinary information system using React, Node.js, and MongoDB Atlas to streamline city veterinary operations.
- Conducted client consultations to gather and implement system requirements.
- Applied UX best practices to design an intuitive interface, reducing confusion during demonstrations and day-to-day use.

TECHNICAL SKILLS

- Experience in HTML, CSS, JavaScript, and TypeScript for building modern, type-safe web applications across both frontend and backend environments.
- Experience in React, Next.js, and Laravel for full-stack web development; strong familiarity with Django and Angular for additional frontend and backend use cases.

- Experience in MongoDB, PostgreSQL, and MySQL — designing schemas, writing queries, and managing data for both relational and document-oriented systems.
- Strong familiarity with Docker and Kubernetes for containerizing applications and managing deployment workflows in modern DevOps pipelines.
- Experience in Power BI for data visualization and reporting, alongside proficiency in Microsoft Excel, Word, and PowerPoint for business and analytical tasks.
- Experience in N8N and OpenClaw for workflow automation; hands-on work with Claude Code and integrations with Anthropic and Gemini models for AI-powered solutions.
- Strong familiarity with REST API and Webhooks for connecting services and enabling seamless data exchange between systems.
- Experience in Git for source control, including push, pull, and branch management across collaborative development workflows.

CORE COMPETENCIES

Analytical Thinking | Effective Communication | Adaptability | Attention to Detail | Client Communication | System Documentation | Problem-Solving

EDUCATION

Bachelor of Science in Information Technology | Bukidnon State University *Graduated June 2025*

Areas of Focus: Web Development, Software Development, Business Analytics, Networking

CERTIFICATIONS

- TopCit Level 2
- Cyber Threat Management – Cisco
- Introduction to Cybersecurity – Cisco
- Patent Drafting Certificate
- Certificate of Internship
