JEFFREY MATI-ONG SEDORO

Valencia City, Bukidnon | +63 951 948 4871 | jeffreysedoro5@gmail.com | linkedin.com/in/jeffrey-sedoro

PROFESSIONAL SUMMARY

Results-driven Automation Specialist, Interactive Developer, and Full-Stack Web Developer with hands-on experience building data infrastructure, automating workflows, and developing full-stack web systems. Strong foundation in Agile development practices. Proven ability to drive operational efficiency through RPA, ETL pipelines, and AI integrations, including LLM-powered features and locally hosted models embedded in production systems. Excellent analytical, communication, and problem-solving skills with the ability to work independently or as part of a team.

WORK EXPERIENCE

Automation Specialist and Interactive Developer | Lumen & Forge LLC |Remote| July 2026 – Present

- Maintained and extend an existing CRM system, adding new features based on business needs.
- Built a collaborative lightboard (whiteboard) feature inspired by tools like Miro and Figma, integrated into the CRM.
- Integrated an AI chatbot into the CRM using LLM models including ChatGPT, Claude, and Gemini.
- Deployed locally hosted LLMs (Nemotron and Qwen, in the 30B–80B parameter range) and embedded them inside the CRM.
- Implemented high-level security across the CRM and lightboard to protect against unauthorized access.
- Communicate directly with the CEO/Founder for output reviews, feedback, and scoping of new, specific features.
- Use LLM tools to speed up development, applying core prompting principles to get precise, intended results.

Data Analyst/Web Developer | Ubest Development Inc. |Onsite| October 2025 – May 2026

- Built a centralized Data Department System across 64 store branches in Cebu, Negros, Leyte, Bohol, and Iloilo, with a pipeline that extracted, transformed, and visualized CRM transaction data and daily sales in a centralized dashboard utilizing React/Next.js, Node.js, PostgreSQL, and Firebase.
- Responded to and managed internal stakeholder requests and requirements to align data efforts with business needs.
- Applied ABC and XYZ analysis to classify slow-moving and fast-moving SKUs, enabling smarter inventory decisions.
- Analyzed current processes and systems to identify inefficiencies and areas for improvement.

- Prepared standard and specialized reports under the direction and guidance of team supervisors and managers.
- Provided analysis and insights to support team and department decision-making.
- Collaborated with members of the team and/or with other functions/departments to execute special studies and projects.
- Improved SKU sales accuracy to 80% through fully automated calculations, eliminating manual data entry in Excel.
- Implemented Robotic Process Automation (RPA) using Yingdao Shadowbot and UiPath for repetitive tasks including web scraping and Windows software interaction, achieving 90% faster task completion.
- Developed an AI assistant within Lark Base for automated data organization, cleaning, and dynamic table creation using an Anthropic model and OpenClaw.

Frontend Developer (Intern) | Logicbase Interactive |Onsite| January 2025 – May 2025

- Developed Moneycache, a Point-of-Sale (POS) web application, serving as the primary frontend developer using Next.js and React.
- Built business logic on the backend using Laravel following the MVC (Model-View-Controller) architectural pattern, ensuring clean separation of concerns and maintainable code structure.
- Designed and implemented a MySQL database schema for storing transaction records, product data, and user information.
- Implemented secure user authentication using Laravel Passport, enabling token-based API authorization across the application.
- Designed responsive UI components and integrated RESTful APIs from the Laravel backend to communicate seamlessly with the React/Next.js frontend.

PROJECTS

BukSU LabSecure System | Backend Developer | Bukidnon State University | August 2023 – March 2024

- Developed a laboratory access management system using Laravel as a full-stack framework.
- Integrated an embedded RFID system for smart lab access control, unauthorized entry monitoring, attendance tracking, and scheduling for students and faculty.

MCity Veterinary | Full Stack Developer | Malaybalay City Veterinary Office | August 2023 – December 2023

- Built a veterinary information system using React, Node.js, and MongoDB Atlas to streamline city veterinary operations.
- Conducted client consultations to gather and implement system requirements.
- Applied UX best practices to design an intuitive interface, reducing confusion during demonstrations and day-to-day use.

TECHNICAL SKILLS

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React, Next.js, Angular, AngularJS, jQuery, Bootstrap; responsive UI design and interactive canvas/lightboard-style interfaces.
- **Backend & APIs:** Node.js, Laravel (MVC, Laravel Passport token authentication), C#/ASP.NET MVC, Django; RESTful API design and integration, Webhooks.
- **Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, Firebase, Supabase (managed PostgreSQL, Row Level Security, Auth, Storage, Realtime, Edge Functions),
- **AI & LLM Engineering:** Integrating LLM APIs (ChatGPT, Claude, Gemini) into web applications and AI chatbots; deploying and embedding locally hosted LLMs (Nemotron, Qwen; 30B–80B parameters); AI assistants for data cleaning and organization; prompt engineering; LLM-assisted development with Claude Code.
- **Automation & RPA:** Yingdao Shadowbot, UiPath, n8n.
- **Data & Analytics:** Power BI, ETL pipelines, ABC/XYZ inventory analysis, Microsoft Excel; Word and PowerPoint for reporting.
- **DevOps & Cloud:** Docker, Kubernetes (YAML configuration), CI/CD practices, Google Cloud Platform (GCP), Amazon Web Services (AWS).
- **Tools & Methodologies:** Git (push, pull, branching, collaborative workflows); Agile (sprint planning, iterative development); debugging and defect investigation and resolution.

CORE COMPETENCIES

Analytical Thinking • Effective Communication • Adaptability • Attention to Detail • Client Communication • System Documentation • Problem-Solving • Agile Practices • Defect Investigation & Resolution • Works Under Minimum Supervision

EDUCATION

Bachelor of Science in Information Technology | Bukidnon State University | Graduated June 2025

Areas of Focus: Web Development, Software Development, Business Analytics, Networking

CERTIFICATIONS

- TopCit Level 2
- Cyber Threat Management – Cisco
- Introduction to Cybersecurity – Cisco
- Patent Drafting Certificate
- Certificate of Internship
